DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haunschild (US 2004/0139053) in view of Chambers, Jr. et al. (US 2005/0027578).
4. With respect to Claims 3 and 4: Haunschild discloses the use of an apparatus and method for supporting the revision of a checklist for checking soundness of a company in accordance with the revision of laws and ordinances (see abstract) comprising:
 - a. A database of laws/ordinances and provisions (Claim 41);
 - b. A computer for supporting the checking of laws and ordinances and compiling updated checklist (claim 41);

- c. A means for connecting a computer to external databases for retrieving updates laws and ordinances (See Paragraph 0051-0085 and 0087);
 - d. When receiving an update the tasks are updates and signals are sent to the departments notifying them of the updates (See Paragraphs 0017 and 0018).
5. Haunschild discloses the use of a web-based system which will generate a revised checklist, however fails to disclose the checklist being saved in a database, and when an update is received, updating the checklist by either modifying the task, deleting a task or adding a task to the checklist in the database. Chambers discloses the use of a first database which stores a checklist (See abstract) and when there is an update to the checklist the stored checklists are updated by modifying, deleting or adding tasks (See Paragraphs 0002, 0024 and 0032). It would have been obvious to one having ordinary skill in the art at the time the invention was made, to store the checklist in a database, and update the checklist when changes are necessary, as disclosed by Chambers and it would have been well within the ordinary skill in the art to update checklist to track changes and to have checklist automatically updated (See Chambers 2 and 3).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Exall et al. (US 2008/0027746) discloses the use of employment law compliance, Bibko et al. (US 2004/0177326) discloses an Audit and Management system of compliance information, Visser et al. (US 2003/0152991) discloses the use of a Compliance management system, Starnes et al. (US 2002/0194014) discloses the use of a regulatory compliance resource

database management system, Smalley et al. (US 2002/0188611) discloses the use of managing regulated entities, Frank et al. (US 2002/0143595) discloses the use of compliance management, Barton et al. (US 2002/0059093) discloses the use of a compliance assessment program, Nelson et al. (US 2004/0243391) discloses the use of a multilingual regulation management system, and Sandifer (6,292,806) discloses the use of an equipment regulatory compliance system and Healthcare Financial Management (HFMA article) discloses the use of a healthcare resource regulation center.
